International Conference

“Citizens’ Participation as a Development Resource: Russian and International Experience with Participatory Budgeting”

September 7, 2018

Moscow, Manezh Central Exhibition Hall

Plenary session

«New Horizons for Developing Participatory Budgeting (PB) Practices in Russia and Globally

Prof Yves Cabannes University College London

Trends and Prospects for PB and for Russian - international cooperation

Leading Questions

Can you predict in what direction and how will participatory budgeting be evolving in Russia and globally?

What trends do you observe already today?

Would it be possible for a team of Russian practitioners from the regions to receive support from the community of international experts of which you are a member?

Is there common ground for future cooperation?

First trend GROWTH AND SPREAD

- High Concentration of experiences in a limited number of countries
- Upscaling in various countries
- New countries gradually joining with experiments

Figure 6.2. The Map of Regions-Participants of the Project on strengthening IB in Russia

Ce projet est financé par l'Union Européenne

Ce projet est mis en œuvre par le RMM et FAMSJ

3^{ème} Atelier Participatif :
Présentation de la faisabilité des idées-projets

Larache, Chefchaouen et Tétouan,
Juin 2015

Second trend :

More and more PB in
Metropolis and Capital
Cities, Federal Districts:

Madrid, Quito, Seoul, Paris,
Yaoundé, Lisbon, New
York, Bogota, Mexico

- With high capacity for social and democratic innovations
- With strong leadership from their Mayors
- And in some cases with significant resources debated

**Third Trend : Local Governments and municipalities continue playing a central role and are the most numerous HOWEVER !
MULTIPLE EXPERIENCES BEYOND MUNICIPAL SCALE**

...earth trends. The overview of spin over: Manifestas of experiences, beyond the government sphere: Transport Agencies [RATP], Community Housing, Schools, Universities, Social enterprises, Professional associations, etc

Fifth trend: Basic services and small equipments at neighbourhood level continue being dominant but many new types of projects are being eligible : software vs hardware .. economy.. wealth / income [China, Africa, LAC]

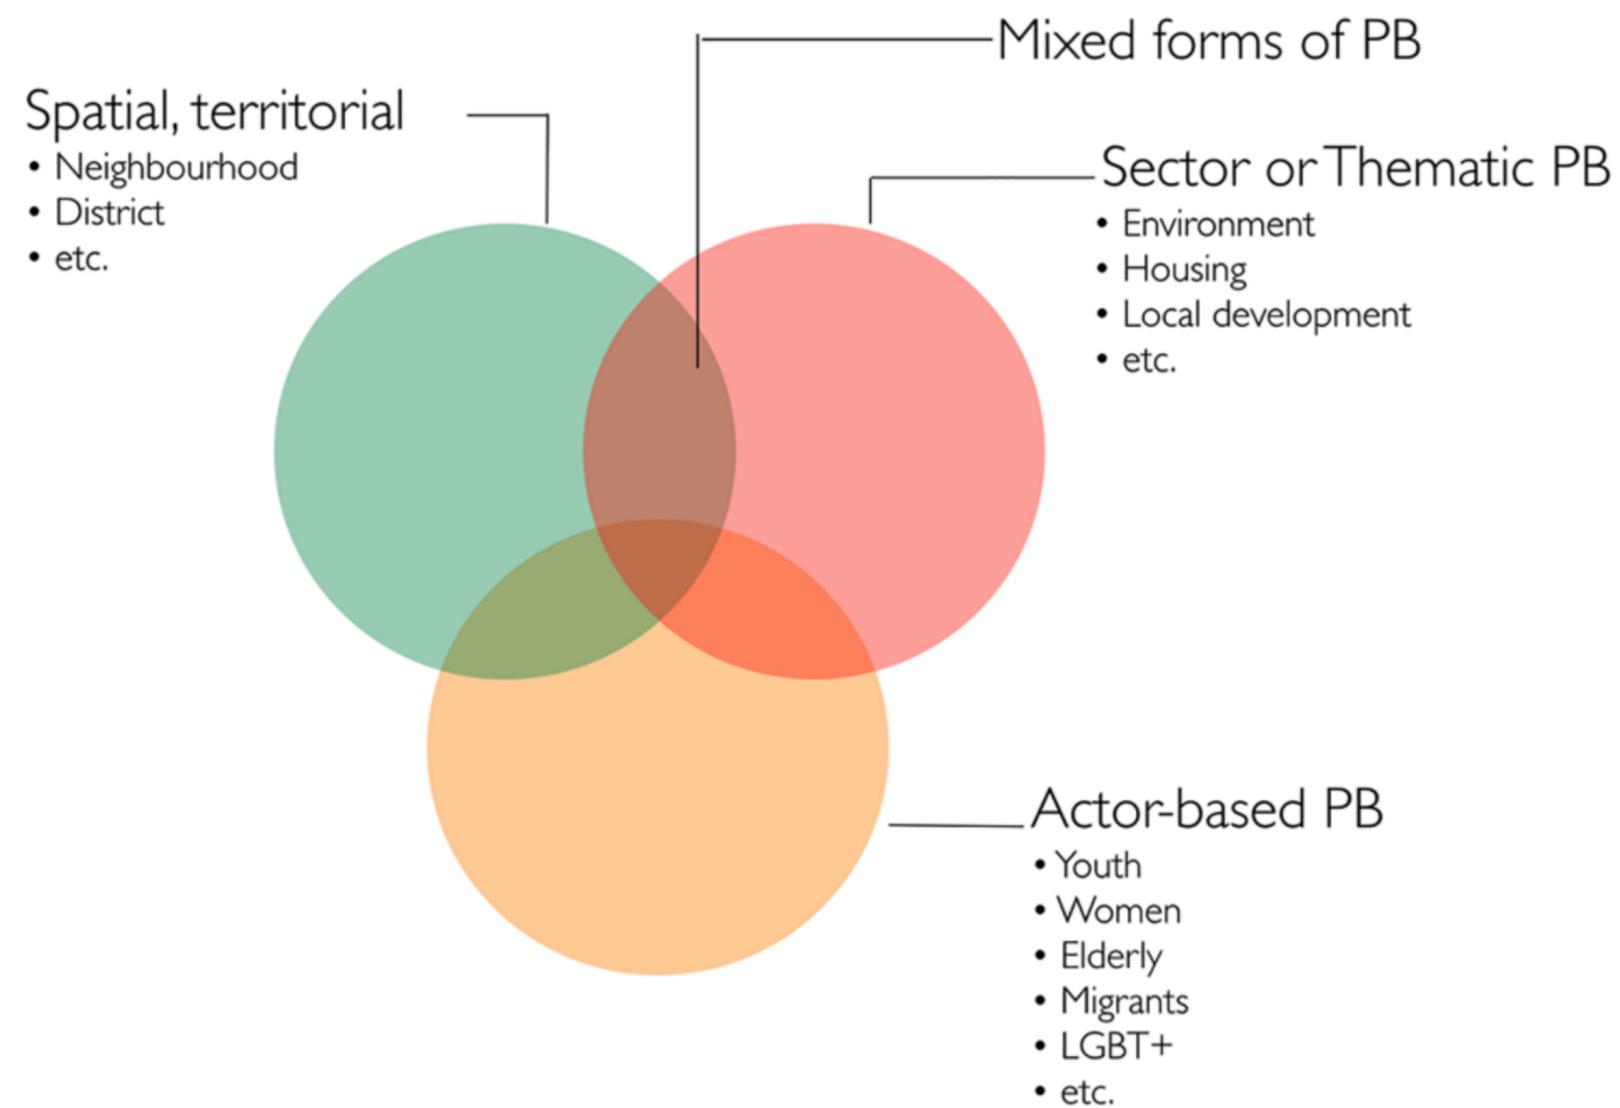

Fifth trend [continues] income generating projects a
wealth creation

Sixth trend: Transform people who then will transform cities: PB as a pedagogic pretext for civic engagement. PB is both an end [improve peoples life] and a means [empower people]

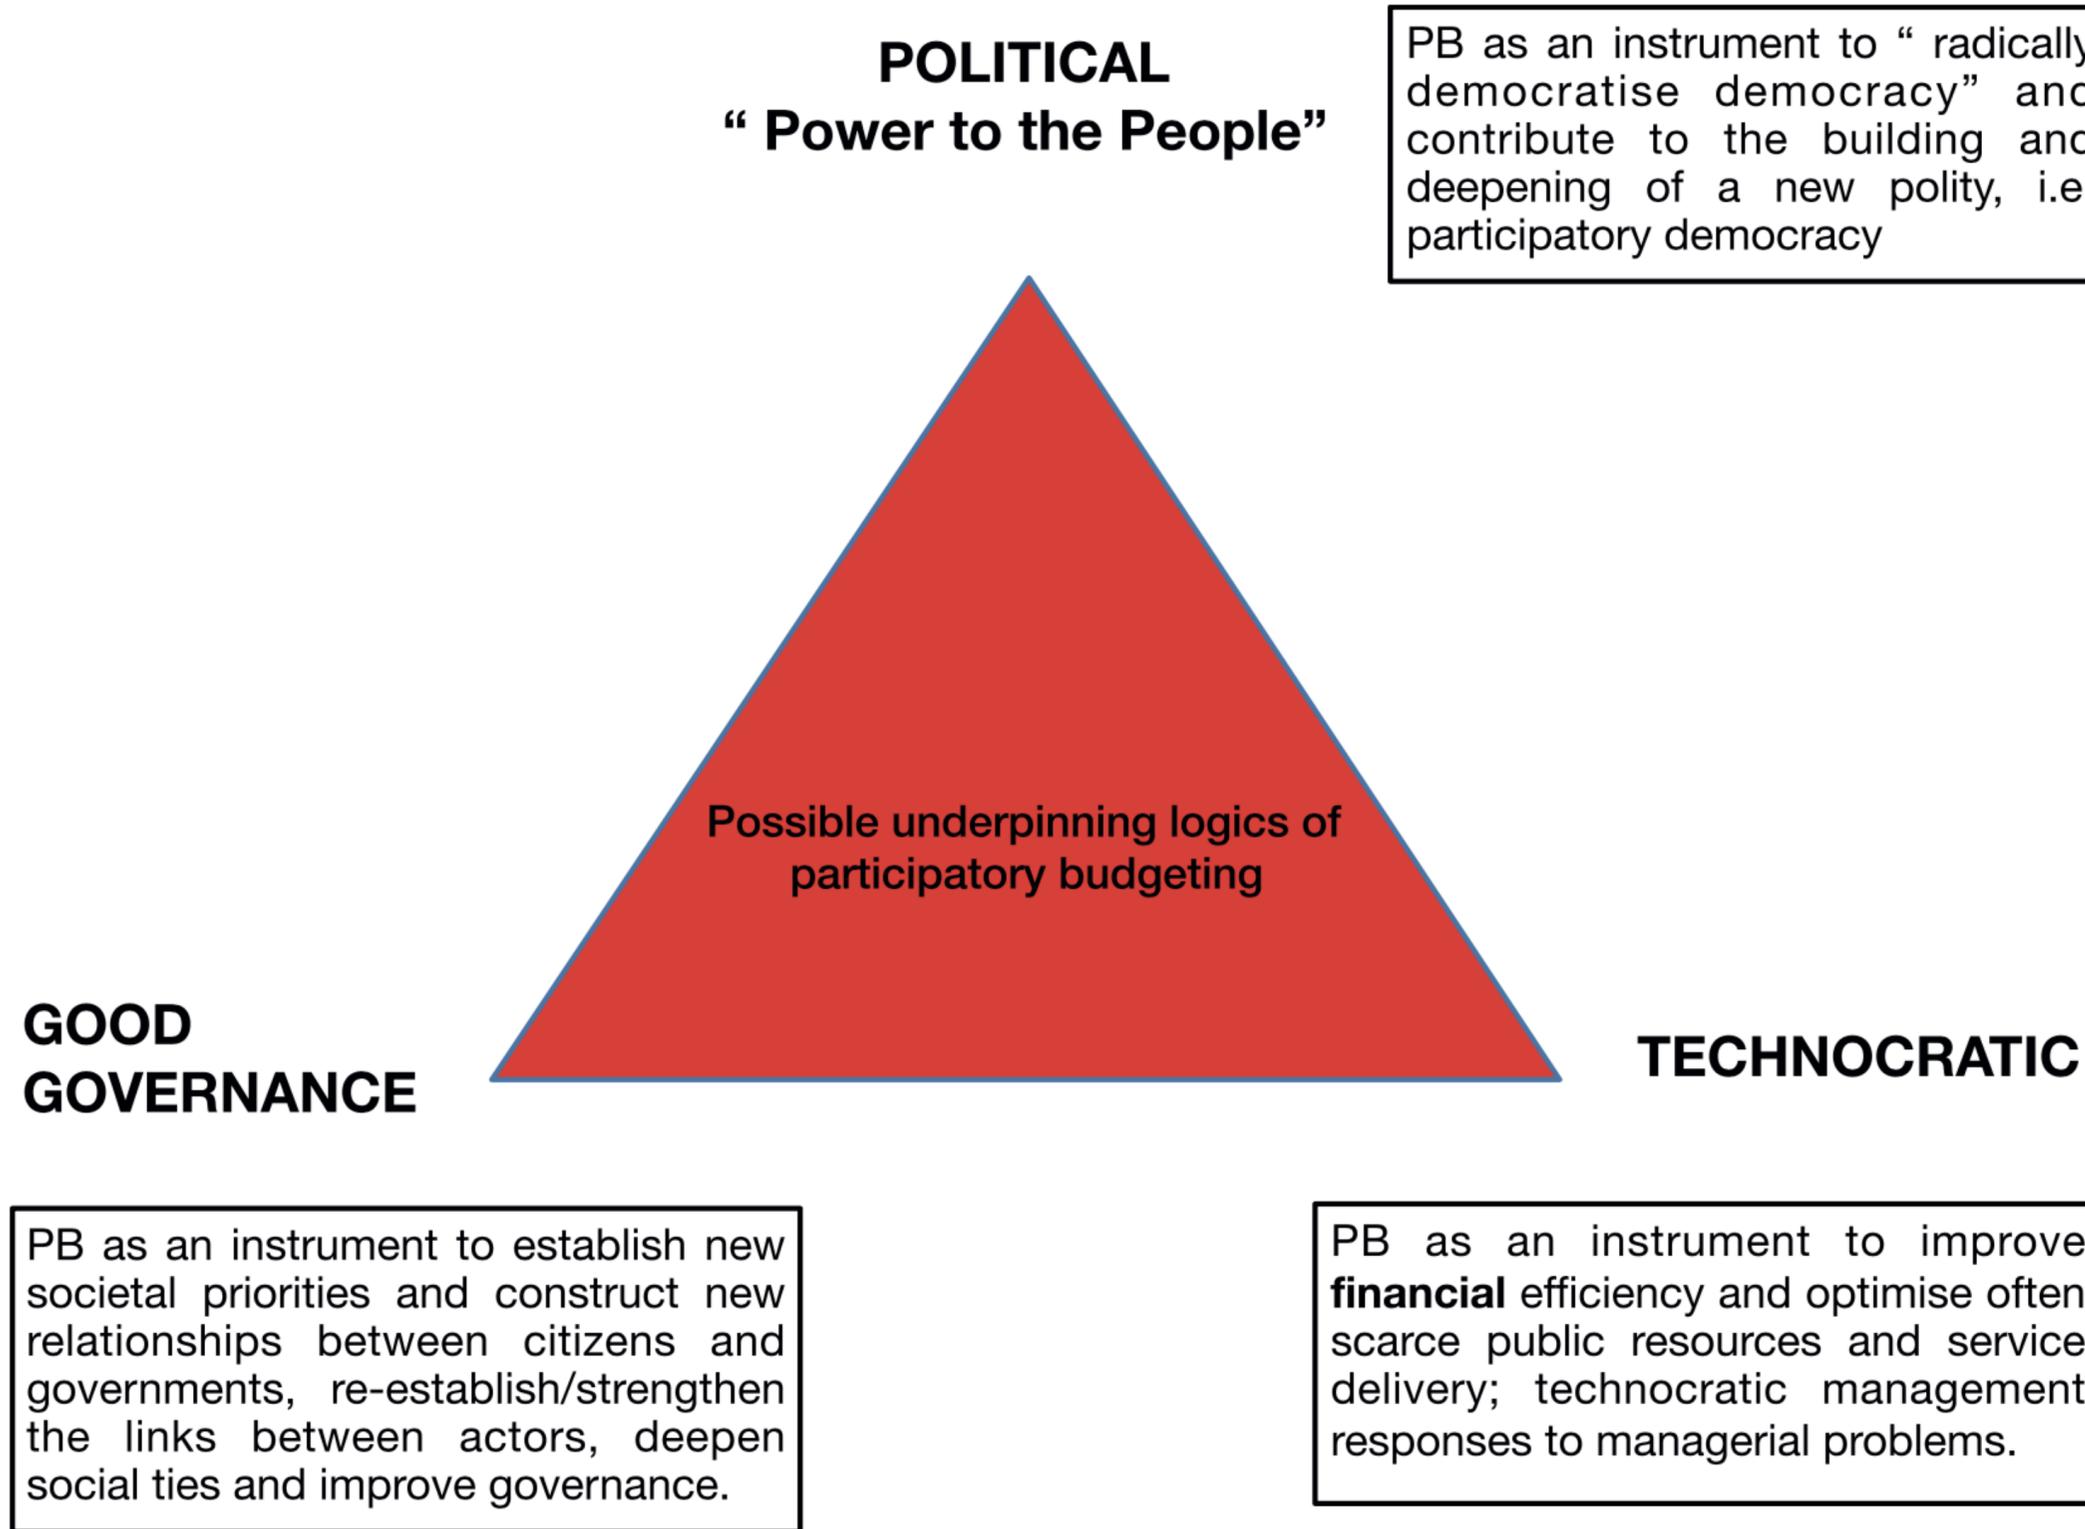

Seventh trend : After years of prominence of Thematic and /or Spatial PBs

Probably more and more **Actor based PBs** with earmarked resources for specific social groups, primarily disadvantaged ones [Youth, elderly, migrants..]. PB will play a growing role in social protection

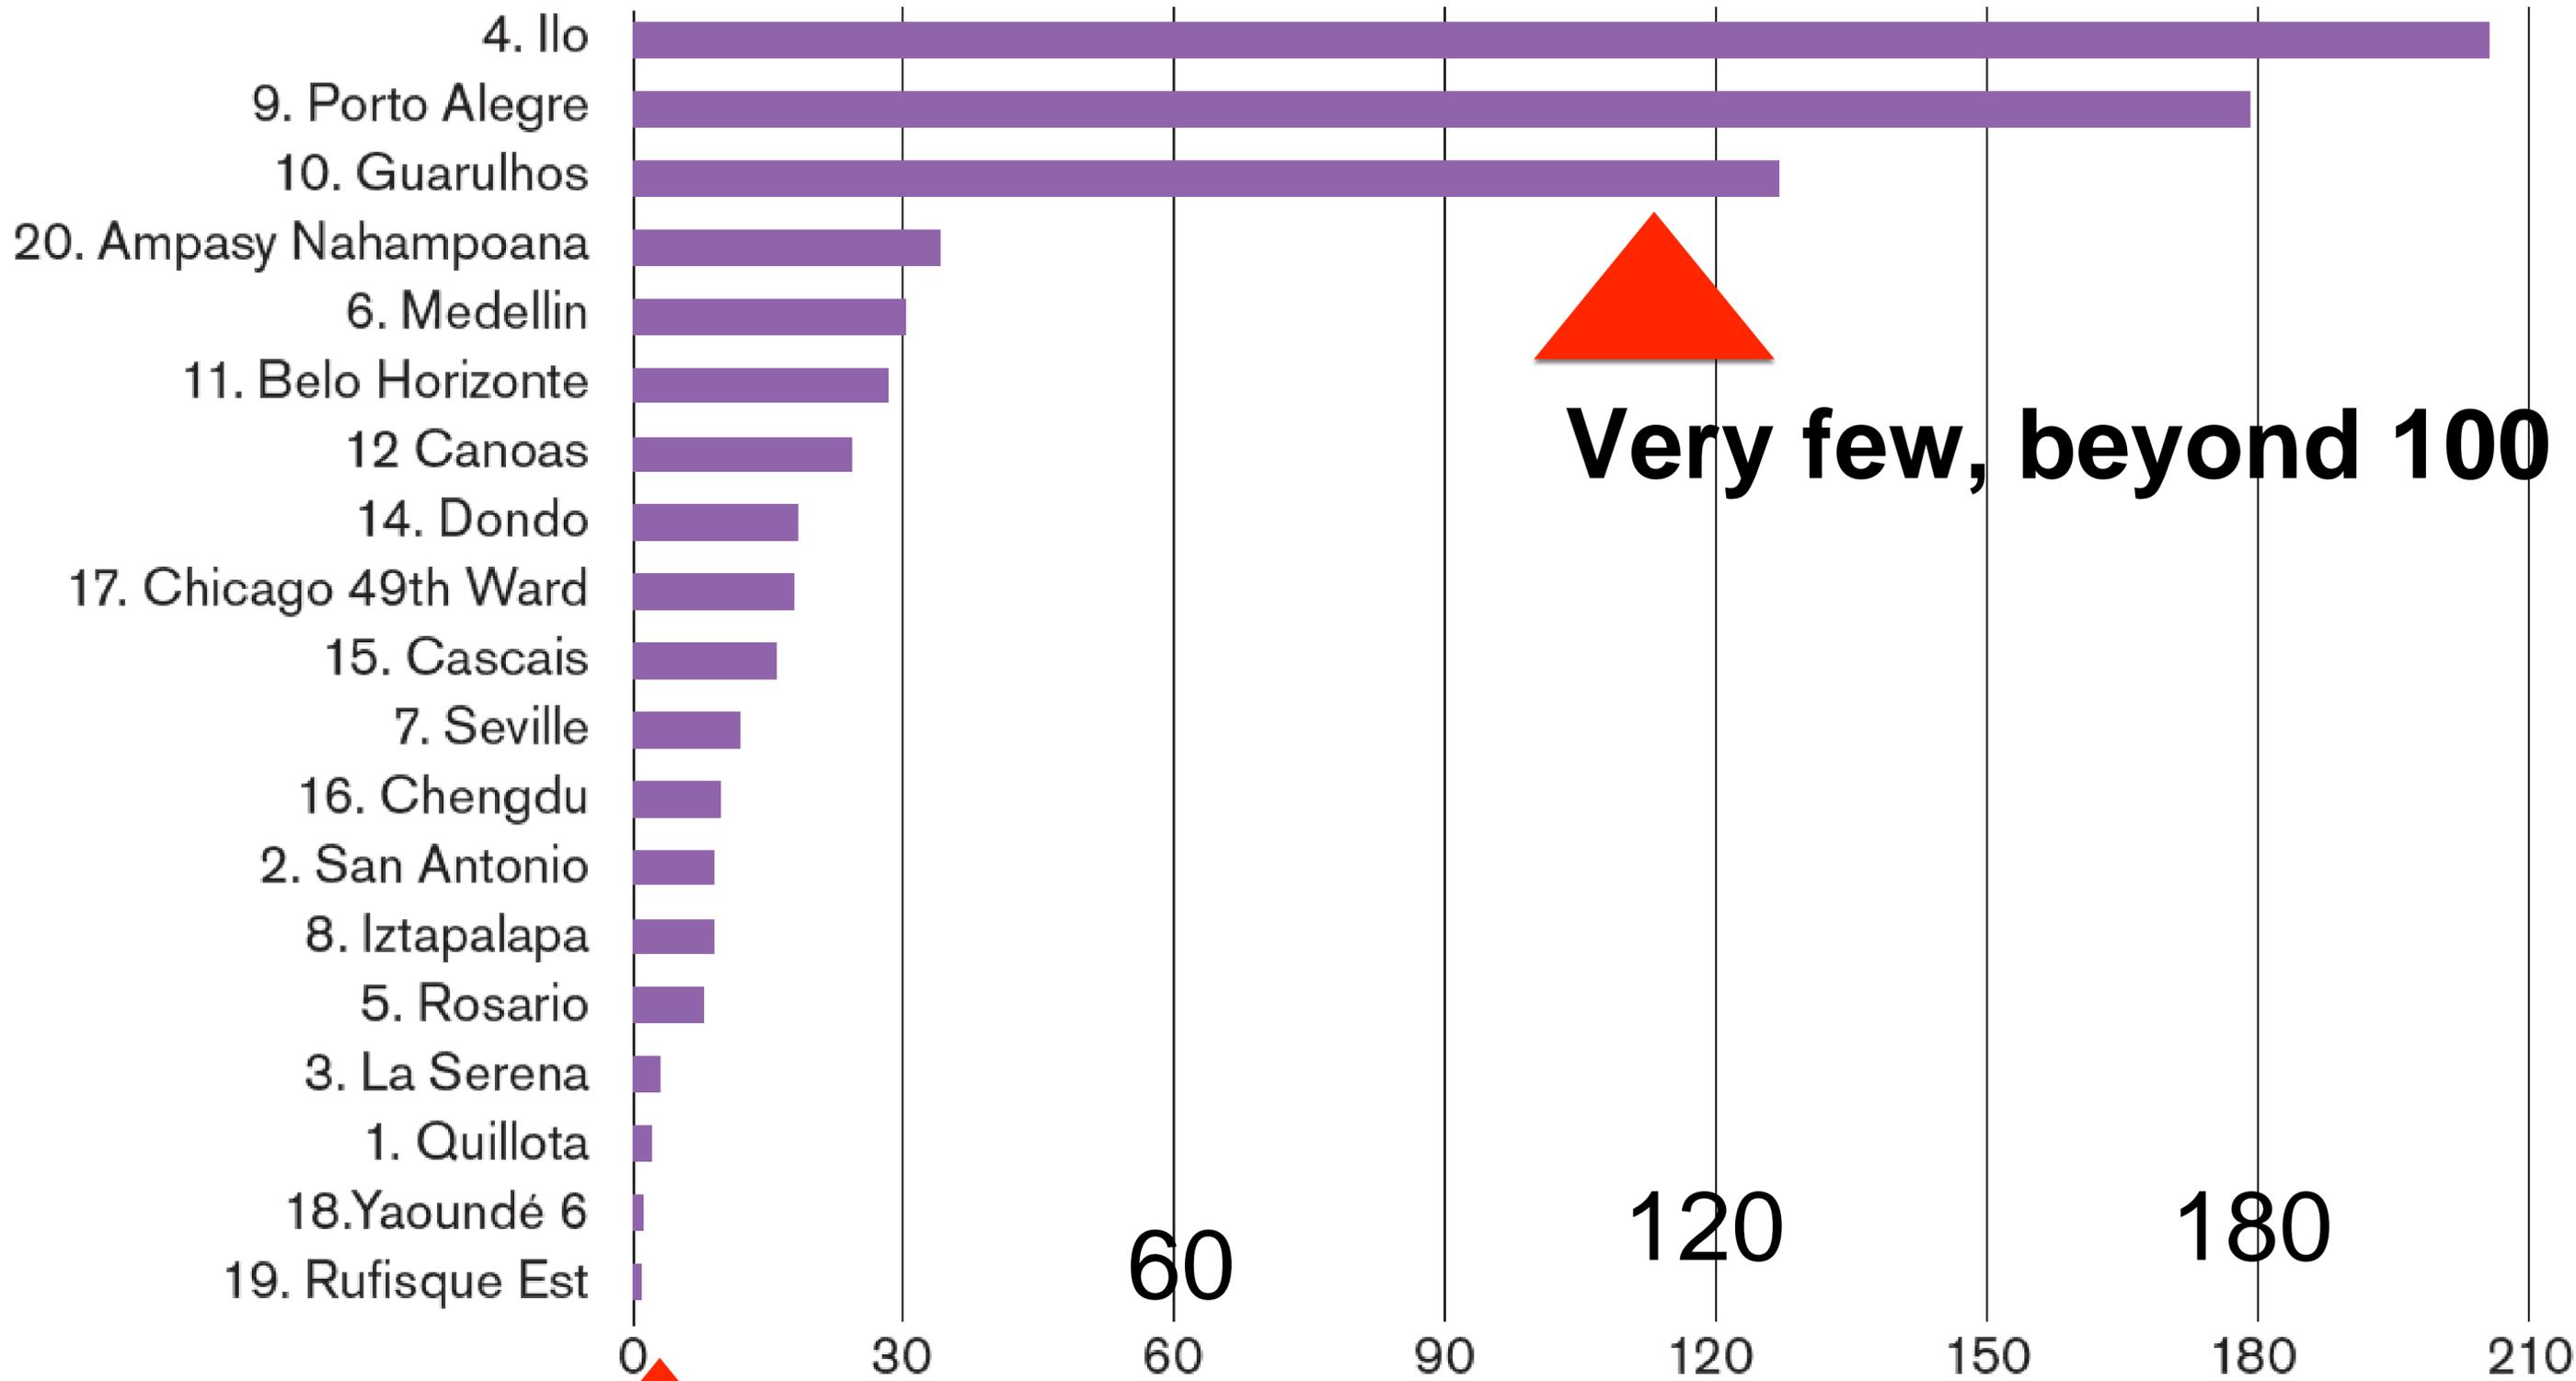

8. What will be the underpinning logics of PB experiences in the future

- The Good Governance logic should continue to be dominant, as in past years
- The “power to people” and radicalisation of democracy logics will remain limited but quite significant in some spots
- The technocratic logics will erratically emerge and stops

9. HOW MUCH BUDGET WILL GO INTO PB [IN \$/ INH / YEAR] ?

Note: Year of reference for analysis 2011 or 2012

More and more >>> Less than 5

Would it be possible for a team of Russian practitioners from the regions to receive support from the community of international experts of which you are a member?

Is there common ground for future cooperation?

This is still to come

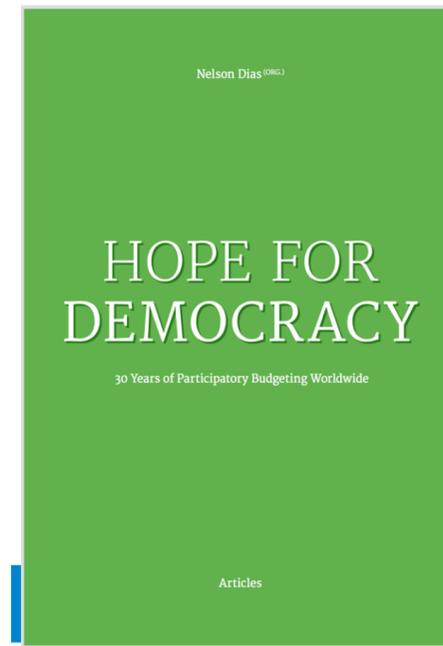

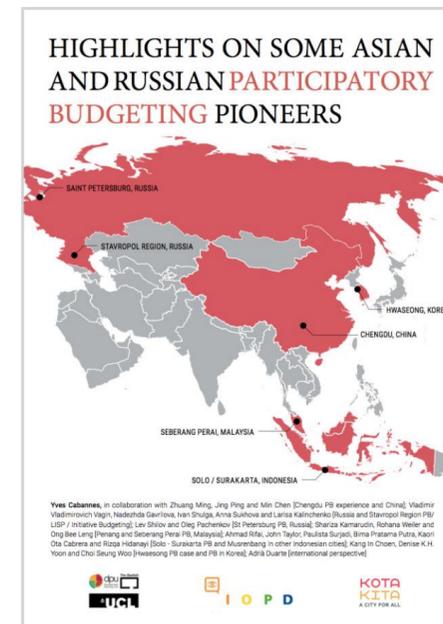

- Joint Research programs
- **Strategic thinking**, for instance on

Reducing vulnerability of experiences

Scaling up

Design /architecture of PB

- **Is there common ground for future**

Is there common ground for future cooperation? Yes !!! [continue]

Some keys for **expanding our exchanges** in the future

- **Objective?** Building a **community of practice**, and involve as much as possible Russians colleagues
- **Peer to peer** perspective: You are a source of innovation and we want to learn from you!
- **Multi-actor's based** [Academy, public servants, decision makers, civil society], and **city or region based** [**Resource cities & Regions**, and **associated ones**]

Some **Challenges** for strengthening exchanges and mutual support

- Sharing common values and being on the same wave length, such as
Participatory Democracy
Human Centered development
Social and Spatial Justice
Inclusion of disadvantaged groups
Deliberation
Along with additional Russian values we need to know better
- Resources
- Going beyond the language barrier [Russian, Portuguese, Spanish, Chinese..]. Translations have to become more systematic
- Long term political support

Thank you for your attention !
